Professional Experience

11/2021 – 02/2022

Front End Developer, Dream AIMI Ltd.

- Designed and built responsive websites using WordPress themes, page builders, and plugins.
- Created clean, user-friendly UI layouts with semantic HTML and modern CSS styling.

Projects

Find My Mate

[Live Link](#) | [Github Client Repository](#) | [Github Server Repository](#)

Find My Mate is a modern, secure, and feature-rich matrimonial web application designed to help users find their ideal life partners.

- Built a full-featured Matrimony Platform with responsive UI using React.js, Tailwind CSS, and Motion, supporting role-based dashboards for Admin, Normal, and Premium users.
- Implemented secure user flows with Firebase Authentication (Email/Google), Stripe payments for premium upgrades, and protected routing across sensitive pages.
- Developed dynamic biodata system with create/edit/view functionality, contact request approval, advanced filtering, favorites management, and “Got Married” success form with image upload.

RateDeck

[Live Link](#) | [Github Client Repository](#) | [Github Server Repository](#)

RateDeck is a full-stack service review platform where users can discover, rate, and share feedback on various services.

- Service Discovery & Review System – Users can browse a wide range of services and share their own experiences through ratings and written reviews.
- Secure Authentication & User Dashboard – Login and registration via Firebase (Email/Google), with personalized access to user-submitted services and reviews.
- Modern Interactive UI – Built with React and Lottie animations, the interface includes animated counters, a dynamic rating system, and responsive design for seamless user experience.

Recipe Book

[Live Link](#) | [Github Client Repository](#) | [Github Server Repository](#)

Recipe Book – your go-to platform to explore, share, and manage recipes from around the world!

- Explore & Share Recipes – Browse by cuisine, like your favorites, and add new recipes with images and detailed instructions.
- User Auth & Personalization – Secure login with Firebase (Email/Google), like system, and theme toggle with DaisyUI.
- Modern & Responsive UI – Built with Tailwind CSS, Lottie animations, and typewriter effects for a smooth, engaging experience.
